

## Description

---

The 1-hole central and 2 lateral hole satin copper metal ceiling canopy kit is perfect for assembling a ceiling or wall lamp with three light points. The satin copper finish, warm yet more subtle than polished copper, adds an elegant and sophisticated touch. The metal ensures strength and durability.

This kit is for you if:

- you're looking for a single lamp with the option to add 1 or 2 pass-through cords
- you love warm tones in a subtle version (the side holes can be closed with the included plugs)

To configure and complete your satin copper ceiling canopy kit with 1 central hole and 2 side holes:

- select the features from the menus
- follow the assembly tutorial
- pair it with decorative light bulbs and Creative-Cables textile cords

Extra tip:

- use clear glass light bulbs to highlight the satin nuances

## Technical specifications:

---
